Job Requisition

About us
Zellerfeld is the only technology company that produces a whole 3D-printed shoe with the push of a button. Through an online platform, every designer in the world will have a chance to sell their shoe designs to anyone who wants to express themselves through customized and personalized 3D-printed shoes.

As a team of energetic engineers that develop their printing technologies in-house, we constantly question the status quo to bring overdue change to an undemocratic and unethical footwear industry. With our disruptive approach of 3D printing every shoe out of fully recyclable materials, we regularly excite our currently small group of customers, which range from NBA and Hollywood stars to Elon Musk's youngest child.

Everything we do happens with the long term in mind. Our actions are guided by decisions that will have a lasting impact. Always with awareness for people and planets.

If you want to be part of the Zellerfeld journey, then this is your opportunity. For our R&D Farm in Hamburg, we are looking for a

Software Developer
(full-time, all genders)

Your Mission
In a small team of experts, you'll develop the brain for the factory of tomorrow. You will enter new territory and be confronted with entirely new problems and requirements. Your main focus will be on collecting and processing production data to automate orders. From cloud computing to embedded systems, the work on an autonomous factory is manifold - so are the challenges you will face.

The Team
We are a start-up, and we take being one team very seriously. You will find a multi-disciplinary team out of engineers, SW and HW specialists, entrepreneurs, designers, students, all being very passionate about Zellerfeld, our customers and our products. We love pushing the limits, solving our issues, and improving what we do and how we do it. CEO, specialists, students all at one desk, happy to work together, but also to do common lunch breaks and team events. Our hierarchy is flat, our ways of working dynamic.

One thing is for sure: Here your voice will be heard, and you can truly make an impact.
About You

You possess a strong affinity for technology, and you are willing to learn new topics on your initiative.

A technological background such as a decisive study, an apprenticeship, previous work experience, solid contributions to Open-Source projects or showing your exceptional abilities otherwise are basic requirements.

You have experience with REST APIs.

You have worked with databases such as MySQL, InfluxDB and/or MongoDB before.

You have experience in software development with Python.

You know at least one other programming language or scripting language such as C#, C++, Java, JavaScript etc.

Ideally, you have already worked on IoT projects yourself.

What we offer

The Spot:
Well-placed within the city of Hamburg and easily reachable by public transport, we are striving to set up a 3D printing R&D hotspot with like-minded people and companies around.

You can be a Part of an Adventure:
We are aiming for nothing less than revolutionizing the shoe industry and 3D printing. As we are still in an early stage, you as an individual can still directly influence the journey. Along the way, you will gather experiences and memories that are unmatched.

Your Development:
Having skilled employees is of paramount importance for us. If you feel you have open development fields, we will be supportive to close them. Our team members have a very diverse set of skills, and we will make sure you get the challenges and training you need to develop yourself further.

If you are interested and want to become a part of our team, please send your application to recruitment@zellerfeld.com

We are looking forward to your application!

One more thing: We love diversity! Therefore, we want your application whatever of your age, gender, roots or whatever makes you unique.
From our everyday life
